# Capture OASIS patient data anytime, anywhere—

the technology is here, and it's from a name you know and trust: Briggs®. OASISync™ helps home care clinicians streamline the OASIS data entry process by integrating electronic OASIS forms and data collection devices—digital pen or tablet computer. It's an efficient, intuitive interface that allows you to spend less time entering data and more time with your patients.

## AS EASY TO USE AS PEN AND PAPER.

Briggs OASISync provides you with a choice of two easy-to-use data collection devices—a digital pen or tablet computer—to use with any of the Briggs nine electronic OASIS forms.

## STOP ERRORS IN THEIR TRACKS.

Briggs understands that missing or incorrect data can lead to delays in workflow and lower reimbursements for your agency. That's why we included an ICD-9 Lookup feature and safeguards to help you generate electronic patient documentation that is error-free.

## PUT BRIGGS ON YOUR SUPPORT STAFF.

For more than 60 years, Briggs has been helping health care providers improve their clinical and financial performance. And we're extending that support with our new OASISync technology. Find out how our hosted solutions can help you:

- Maintain regulatory compliance with the most current electronic OASIS forms.
- Preserve patient privacy through secure, HIPAA-compliant data transfer.
- Eliminate down time with Briggs Customer Support program

COMPUTER TABLET

Choose between the handheld computer tablet or the digital pen. Either option is exceptionally user-friendly and easy-to-learn. You'll be ready to use it with only minimal training.

DIGITAL PEN

As you enter data using OASISync, your pen strokes are instantly translated into fully editable text.

### THE PRODUCT INCLUDES:

Briggs OASISync software

Access to nine Briggs electronic OASIS forms

Data collection device - digital pen with paper OR tablet computer

Technical support

Streamline your data entry so you'll realize improved clinical outcomes and faster reimbursements for your agency. Let Briggs show you how with OASISync.
